SEEING AND PERCEIVING

To drive a car you need to see. Seems obvious. But we're talking about more than just wearing your glasses so your eyes will register a clear image. Seeing means your eyes and mind are sending the real situation behind the picture your eyes give you. For example, you're driving down a residential street. A ball rolls out into the street in front of you. You see it and recognize that that's the end even if there aren't all of it. You hit it. Seeing gives right on now it. A car have a long way.

You haven't really seen the situation. A ball rolling into the street means there are probably children nearby — and one of them is likely to run out into the street after the ball. So the perceptive driver in this situation will take his foot off the gas, check both sides of the street for children, be ready to stop. He has seen more than just a ball in the street. He's seen a potential tragic situation and is prepared to avoid it.

More examples of the difference between seeing and perceiving. A light goes green. You see the taillights of the car ahead. He stays put for a split of seconds but what you really see is that the other driver has taken his foot off the accelerator. He may not be stopping for the light yet but he's slowing down — perhaps to turn or stop. You'd better be ready to stop. You're driving down the street and notice that exhaust coming from a parked car. The driver could open the door just in front of you or he may drive off and get ready to avoid him if he does. You're approaching an intersection. Another car is coming on the side road — fast. You see that he's got a stop sign. But you realize that he might not stop. So you get ready to stop if he doesn't.

In all of these cases just seeing isn't enough. You've got to recognize the potential problem in a situation and take the necessary action to prevent the accident from happening. How do you do it? Listed below are the five principles of defensive driving popularized by Harold T. Smith, a universally recognized authority on road safety. Having had experience in the tough school of truck driving, Smith then became a driving instructor and is now a safety consultant in Los Angeles. The National Safety Council has made a film on each of these principles. Here's what they suggest: 1 Aim high in steering 2 Get the big picture 3 Keep your eyes moving 4 Leave yourself an out 5 Make sure they see you. Here they are.

1 Aim high in steering. This means to look far down the road at the middle of your lane. This has two big advantages. First, it tends to keep you in the middle of the road. Most drivers tend to hug the left side. Second, aiming high lets you know what is happening up ahead so you have time to make adjustments for upcoming situations.

2 Get the big picture. Know what's going on in back of you and at both sides, as well as in front of you. That includes everything for a block in town and a half mile in the country. You get the big picture by snapping quick glances of your rearview mirror, both sides and everything on or near the road ahead. Watch traffic lights and signs, other cars' brake and turn signals — and the front wheels of other cars, whether moving or parked.

3 Keep your eyes moving. Most of us tend to stare. This builds our knowledge of everything except what's directly ahead. This tendency is especially strong if you wear glasses and them have don't see very well to the sides. Move your eyes every two seconds — to the sides and to everything ahead.

4 Leave yourself an out. Don't box yourself into a corner. A good driver will leave a cushion of space between himself and the cars around him. He'll keep well back from the cars in front. Try to move away if a car behind him tries to tailgate and avoid driving right beside or behind cars in adjacent lanes. These precautions give him room to stop or swerve if necessary.

5 Make sure they see you. Let other drivers know you're there and what you're planning to do. Use your lights, turn signals and horn. Don't lean on your horn, of course. But give your horn a tap if conflict seems to be developing. That will let him know that you're there and that you see something happening that he should notice too.

IS YOUR HAIR GROWING OR GOING?

Stand in front of a mirror. Take a long hard look at the top of your head. Do you have as much hair as one year ago? Do you see any new hair growth?

If your answer is no, it is important that you take steps today to save the hair you now have. If you act now, you may be able to reverse the trend on your head. You may be able to grow new hair faster than it is falling out. Doesn't that make sense to you? Wouldn't you like to look in the mirror a year from now and see more hair on your head than you see now? Why lose your hair if you don't have to?

CAN YOU SAVE YOUR HAIR?

Every year thousands of men and women go bald — needlessly — because of a scalp infection. This scalp infection is called seborrhea. Doctors say that three germ organisms cause seborrhea: staphyloccocus albus, pityrosporum ovale, and microbacillus. These germs attack the sebacious glands and the hair follicles themselves. If not checked, permament damage is done. The hair follicles atrophy, lose their ability to produce new hairs. The result: premature baldness.

You can easily tell if you are a victim of seborrhea. If you have itchy scalp, dandruff, hair loss, very dry or oily scalp, the chances are that you have seborrhea. Neglect these symptoms and you invite baldness.

Treat your scalp to Ward's Formula. This amazing scalp medicine quickly controls seborrhea and stops the hair loss it causes.

Here's the Proof!

I must admit I didn't have much faith in it, but I hadn't been using Ward's one week before I could see it was helping me. I could feel my hair getting thicker.
E. K., Cleveland, Ohio

After using Ward's for only 12 days, my hair has stopped falling out.
R. W. C., Cicero, Ill.

Out of all the Hair Experts I went to, I've gotten the most help from one bottle of Ward's Formula.
C. La M., Philadelphia, Pa.

I am tickled to death with the results. In just two weeks' time—no dandruff! *W. T. W., Portola, Cal.*

I feel encouraged to say that the infuriating scalp itch which has bothered me for 5 years is now gone.
J. M. K., Columbus, Ohio

Male pattern baldness is the cause of the great majority of cases of baldness and excessive hair loss, for which neither the Ward treatment nor any other treatment is effective.

DOUBLE MONEY BACK GUARANTEE

In seconds, Ward's Formula kills the three parasitic germ organisms retarding normal hair growth. This swift germicidal action has been proven in scientific tests by a world-famous testing laboratory (copy of laboratory report sent on request). Ward's removes infectious dandruff, stops scalp itch, brings hair-nourishing blood to the scalp, tends to normalize very dry or oily scalp. In brief Ward's Formula corrects the ugly symptoms of seborrhea, stops the hair loss it causes. Ward's Formula has been tried by more than 550,000 men and women on our famous Double-Your-Money-Back Guarantee. Only 1.9% of these men and women were not helped by Ward's and asked for their double refund. This is truly an amazing performance.

Why not join the men and women who have successfully ended their troubles? Treat your scalp with Ward's Formula. *Try it at our risk.* In only 10 days you must see and feel the marked improvement in your scalp and hair. Your dandruff must be gone. Your scalp itch must stop. Your hair must look thicker, more attractive, and alive. Your excessive hair loss must stop. You must be completely satisfied—in only 10 days—with the improved condition of your scalp and hair, or simply return the unused portion for Double Your Money Back. So why delay? Delay may cost your hair.
